EXPERIENCE

Web Designer

DealerOn
2013–Present

- Design and develop responsive web solutions on-the-fly in a deadline-driven production environment.
- Design and develop Css framework for proprietary cms using Sass, Gulp, and Jekyll. Create wireframes and code mockups, conduct usability testing.
- Developed non-technical employees into effective coders through weekly Html/Css classes.
- Work closely with developers and designers to create widgets, update platform, and improve sites.
- Maintain hundreds of stylesheets and templates.
- Create graphics and collateral from nametags to business cards and website banners.

Designer

Freelance
2010–Present

- Create advantageous digital solutions for clients within their budget, goals, and timeline.
- Design print collateral, logo, and website for individuals, small businesses, and non-profits.

EDUCATION

Bachelor of Science

Full Sail University
2007–2010

- Received Course Director's Award for excellence in 3D modeling and texturing in final demo reel.
- Work through rigorous weekly deadlines in groups to accomplish an onslaught of projects that span the entire 3D pipeline.

INTERESTS

I love Jesus, being a husband, and a father. When I'm not hunkered over my computer you can find me scaling a mountain, at the local basketball courts, in the kitchen, or with my family.
